

Invasive species injectors available for rent in Mid-Michigan counties

For more information, contact Erin Pavloski, Regional Invasive Species Coordinator, Ingham Conservation District, erin.jarvie@macd.org

The Mid-Michigan Cooperative Invasive Species Management Area (CISMA) has invasive species injectors available to local landowners in Clinton, Eaton, Ingham, and Ionia counties. These injectors are useful for local residents to treat small infestations of invasive Japanese, giant, and Bohemian knotweeds and are best used when knotweed is in bloom- August into September. Through this injector rental program, the Mid-Michigan CISMA hopes to empower local citizens in invasive species management.

Invasive species injection system

The injectors will be available for four-day rental sessions with a refundable deposit and staff will train you to use the injection system. Contact your county conservation district to learn more and reserve your rental dates:

Clinton Conservation District: 989-224-3720 ext. 3

Eaton Conservation District: 517-543-1512 ext. 5

Ingham Conservation District: 517-676-2290

Ionia Conservation District: 616-527-2098

The Mid-Michigan CISMA is funded in part by the Michigan Invasive Species Grant Program (www.michigan.gov/invasives).
